Abstract

Event logs from the U.S. GLOBEC Georges Bank project, from 10 vessels and 104 cruises in the Gulf of Maine and Georges Bank area from 1994-1999. Event logs provide an overall summary of the sampling activities during a cruise.

Coverage

Spatial Extent: N:44.6922 E:-61.302 S:38.6888 W:-71.41883
Temporal Extent: 1994-05-03 - 1999-12-13

Dataset Description

Event logs provide an overall summary of the sampling activities during a cruise. A hard copy of the event log is also included in the [cruise report](#). Further documentation about event logs is available in [Chief Scientist Data Reporting Requirements](#).

For further information contact the [Data Management Office](#).

Last updated November 03, 2006; gfh

Methods & Sampling

Cruise Event Log Event logs provide an overall summary of the sampling activities during a cruise. A hard copy of the event log is also included in the cruise report. Further documentation about event logs is available in Chief Scientist Data Reporting Requirements.

Data Processing Description

BCO-DMO data manager processing notes:

* Version 2 (2021-06-08) replaces version 1 (2011-02-01). Source file encoding converted from iso-8859-1 to UTF-8.

Parameters

Parameter	Description	Units
cruiseid	Cruise identifier, e.g. EN331 = R/V Endeavor cruise number 331.	
year	year, e.g. 1995.	
platform	ship, mooring, fixed location name	
timediff	Number of hours added to local time to convert to GMT (e.g. +5).	
event	event or sampling operation number	
inst	instrument used to collect data, see: instrument list	
cast	cast number	
station	consecutive station number	
station_std	standard broad-scale station number, per assigned, see: Broad-scale Station Plans	
day_local	day of month, local time	
month_local	month of year, local time	

time_local	time of day, local time, using 2400 clock format	
se_flag	sampling operation start (s) or end (e) flag	
lat	latitude, negative = South	
lon	longitude, negative = West	
depth_w	depth of water	meters
depth	depth of sample	meters
si	scientific investigator's name	
region	geographical area of sampling	
day_gmt	day of month, gmt time	
month_gmt	month of year, gmt time	
time_gmt	time of day, GMT	
comments	free text comments

Project Information

U.S. GLOBEC Georges Bank (GB)

Website: http://globec.who.edu/globec_program.html

Coverage: Georges Bank, Gulf of Maine, Northwest Atlantic Ocean

The U.S. GLOBEC [Georges Bank](#) Program is a large multi- disciplinary multi-year oceanographic effort. The proximate goal is to understand the population dynamics of key species on the Bank - Cod, [Haddock](#), and two species of zooplankton ([Calanus finmarchicus](#) and [Pseudocalanus](#)) - in terms of their coupling to the physical environment and in terms of their [predators and prey](#). The ultimate goal is to be able to predict changes in the distribution and abundance of these species as a result of changes in their physical and biotic environment as well as to anticipate how their populations might respond to climate change.

The effort is substantial, requiring broad-scale surveys of the entire Bank, and process studies which focus both on the links between the target species and their physical environment, and the determination of fundamental aspects of these species' life history (birth rates, growth rates, death rates, etc).

Equally important are the modelling efforts that are ongoing which seek to provide realistic predictions of the flow field and which utilize the life history information to produce an integrated view of the dynamics of the populations.

The U.S. GLOBEC Georges Bank [Executive Committee \(EXCO\)](#) provides program leadership and effective communication with the funding agencies.

Program Information

U.S. GLOBAL ocean ECosystems dynamics (U.S. GLOBEC)

Website: <http://www.usglobec.org/>

Coverage: Global

U.S. GLOBEC (GLOBal ocean ECosystems dynamics) is a research program organized by oceanographers and fisheries scientists to address the question of how global climate change may affect the abundance and production of animals in the sea.

The U.S. GLOBEC Program currently had major research efforts underway in the Georges Bank / Northwest Atlantic Region, and the Northeast Pacific (with components in the California Current and in the Coastal Gulf of Alaska). U.S. GLOBEC was a major contributor to International GLOBEC efforts in the Southern Ocean and Western Antarctic Peninsula (WAP).
