

## **Data Management Plan**

Data from the proposed research will be entered into Excel as they are collected, and two back-ups made of both the electronic files and original data sheets. These redundant copies will be stored in independent locations on UCSC campus and at the Fisheries Ecology Division, Southwest Fisheries Science Center, Santa Cruz, CA. After our initial publications, the data will be made freely available through the PIs UCSC website and via Dryad (<http://www.datadryad.org/>).
